IN960117 - Induced mutations using *in vitro* culture in FAO/IAEA programme.

Ahloowalia, B.S.; Maluszynski, M.; Nichterlein, K.; van
Zanten, L.; Weck, E.

in: Report of the first FAO/IAEA research co-ordina-
tion meeting on cellular biology and biotechnology
including mutation techniques for creation of new
useful banana genotypes. - IAEA. International Atomic
Energy Agency. Vienne (AUT); FAO. Food and Agri-
culture Organization of the United Nations. Rome (ITA)
Cellular Biology and Biotechnology Including Muta-
tion Techniques for Creation of New Useful Banana
Genotypes, Vienne (AUT), 1995/11/20-24, ENG
Joint FAO/IAEA Division of Nuclear Techniques in
Food and Agriculture, Vienne (AUT)
1996/01, 65-71, réf. 11

The Plant Breeding and Genetics Section promotes the
use of *in vitro* techniques in combination with radiation
induced mutations to improve local crop varieties and
land races. It supports research and development in
plant tissue culture to increase the availability of food,
feed and renewable raw materials through the transfer
of plant tissue and cell culture techniques. The
operational co-ordinated research programmes in which
in vitro techniques are being used in one form or another
to assist mutation induction and selection are reviewed.
